

Preformed Thermoplastic Road Markings

- PREEFAB
- 3D-PREEFAB
- DECOPREEFAB

REEF road marking experts since 1995

Definition:

PREEFAB is a prefabricated hot melt thermoplastic road marking that can be applied to road surfaces by a single heat torch.

REEF Co. manufactures preformed thermoplastic road marking in the form of sheets and rolls and also provides its clients with made to order service.

PREEFAB advantages:

- Fast permanent application, requiring only one operator
- Do not need preheating
- Long lasting durability, lasts 6 to 8 times longer than conventional paint
- Prefabricated and ready to use
- Higher retroreflection
- Wide range of colors
- Formulated for hot and cold climates
- One year shelf life
- Environmental friendly

Application:

The 4 simple stages are as follow,

1. Cleaning the surface
2. Applying the special primer (If required)
3. Positioning the PREEFAB on road surface using existing drawing
4. Attaching PREEFAB using the heat torch

Special glassbeads distributes evenly thorough the surface of PREEFAB and along its thickness in order to have retroreflectivity even after regular wearing due to the time.

3D PREEFAB DECOPREEFAB

By REEF Co.

3D PREEFAB

3D PREEFAB causes drivers to slow down by using a 3-dimensional obstacle effect.

- Principles of the 3-dimensional effect are demonstrated by a 3 color combination of flat sheets.
- Concerning 3-dimensional shapes and color, we selected the most effective ones of samples after our various tests.
- 3D PREEFAB have a great effect on drivers to reduce their speed.
- Mainly used for narrow roads going through housing areas.

REEF road marking experts since 1995

DECOPREEFAB

Playgrounds, decorative and creative markings by REEF Co.

- DECOPREEFAB makes the boring surfaces colorful and beautiful.
- DECOPREEFAB can be used for special designs of logos, games, etc.
- DECOPREEFAB is available in 15 colors, which makes it easier to design different signs.
